## Part I

### AutoCAD Basics

<b>1</b>	<b>Getting Started with AutoCAD .....</b>	<b>3</b>
	Starting AutoCAD .....	4
	Understanding the AutoCAD Interface .....	5
	UCS Icon .....	8
	Crosshairs, Pickbox, and Cursor .....	8
	Status Bar .....	9
	Pull-Down Menus .....	11
	Shortcut Menus .....	12
	Toolbars .....	13
	Model Tab and Layout Tabs .....	17
	Command Window .....	18
	Text Window .....	19
	Screen Menu .....	21
	Digitizer Template .....	21
	Selecting Commands .....	22
	Starting Commands from Menus .....	22
	Starting Commands from Toolbars .....	23
	Starting Commands from the Command Line .....	24

Using Shortcut Menus .....	24
Using Pointing Devices .....	26
Repeating a Command .....	26
Using Commands Transparently .....	27
Correcting Mistakes .....	28
Getting Online Help .....	29
Opening Existing Drawings .....	33
Working with Multiple Drawings .....	36
Using Partial Open and Partial Load .....	37
Saving Your Work .....	39
Viewing and Updating Drawing Properties .....	40
Exiting from AutoCAD .....	41

<b>2</b> Drawing Basics .....	43
Starting a New Drawing .....	44
Using the Drawing Wizards .....	46
Using Template Drawings .....	51
Starting a Drawing from Scratch .....	52
Setting Up a Drawing .....	53
Setting the Current Layer .....	53
Creating New Layers .....	54
Setting the Current Object Color .....	55
Setting the Current Linetype .....	57
Setting the Current Linetype Scale .....	60
Setting the Current Lineweight .....	61
Setting the Drawing Units .....	64
Understanding Scale Factors .....	66
Setting the Drawing Limits .....	68
Using Grid and Snap .....	69
Setting a Reference Grid .....	69
Setting Snap Spacing .....	70
Changing the Snap Angle and Base Point .....	71
Using Isometric Snap and Grid .....	71
Using Polar Snap .....	72
Using Ortho Mode .....	73
Using Object Snaps .....	74
Endpoint .....	75
Midpoint .....	75
Intersection .....	75
Apparent Intersection .....	76
Extension .....	77
Center .....	78
Quadrant .....	78
Tangent .....	78
Perpendicular .....	79
Parallel .....	80
Insertion .....	81
Node .....	81
Nearest .....	81

	None .....	82
	Setting a One-Time Object Snap .....	82
	Setting a Running Object Snap .....	83
	Controlling AutoSnap .....	83
	Using AutoTrack .....	86
<b>3</b>	<b>Creating Simple 2-D Objects .....</b>	<b>95</b>
	Drawing Lines .....	96
	Drawing Circles .....	98
	Drawing Arcs .....	100
	Drawing Ellipses .....	106
	Drawing Elliptical Arcs .....	108
	Creating Point Objects .....	110
	Changing Point Styles .....	110
	Drawing Construction Lines .....	111
	Drawing Xlines .....	112
	Drawing Rays .....	113
	Creating Freehand Sketches .....	114
	Erasing Freehand Sketch Lines .....	115
	Setting the Sketch Method .....	116
<b>4</b>	<b>Creating More Complex 2-D Objects .....</b>	<b>117</b>
	Drawing Rectangles .....	118
	Drawing Polygons .....	120
	Drawing Inscribed Polygons .....	120
	Drawing Circumscribed Polygons .....	122
	Drawing Multilines .....	123
	Drawing Polylines .....	124
	Straight-Line Polylines .....	125
	Polyline Arcs .....	126
	Drawing Spline Curves .....	131
	SPLINE Command Options .....	133
	Drawing Donuts .....	137
	Creating Solid-Filled Areas .....	138
	Creating Regions .....	139
	Creating Regions with the REGION Command .....	140
	Creating Regions with the BOUNDARY Command .....	141
	Understanding Boolean Operations .....	143
<b>5</b>	<b>Viewing Your Drawing .....</b>	<b>147</b>
	Redrawing and Regenerating a Drawing .....	148
	Moving Around Within a Drawing .....	149
	Using Scroll Bars .....	149
	Using the PAN Command .....	149
	Changing the Magnification of Your Drawing .....	150
	Zooming in Realtime .....	152
	Using a Zoom Window .....	153
	Displaying the Previous View of a Drawing .....	154
	Zooming to a Specific Scale .....	155

Centering the Zoom Area .....	156
Displaying the Entire Drawing .....	157
Using the Aerial View .....	157
Resizing the Aerial View Image .....	159
Changing the Aerial View Options .....	159
Using Named Views .....	160
Saving Named Views .....	161
Restoring Named Views .....	163
Using Multiple Viewports .....	163
Dividing the Current Viewport into Multiple Viewports .....	164
Saving and Restoring Viewport Configurations .....	167
Controlling Visual Elements .....	170
Turning Fill On and Off .....	170
Turning Lineweight On and Off .....	172
Turning Text Display On and Off .....	172
Turning Highlighting On and Off .....	173
Turning Blips On and Off .....	173
<b>6 Working with Coordinates .....</b>	<b>175</b>
Using Cartesian Coordinate Systems .....	176
Understanding How Coordinate Systems Work .....	176
Understanding How Coordinates Are Displayed .....	177
Finding the Coordinates of a Point .....	178
Using Two-Dimensional Coordinates .....	179
Entering Absolute Cartesian Coordinates .....	179
Entering Relative Cartesian Coordinates .....	180
Entering Polar Coordinates .....	181
Using Direct Distance Entry .....	182
Using Three-Dimensional Coordinates .....	183
Using the Right-Hand Rule .....	183
Entering X,Y,Z Coordinates .....	184
Entering Spherical Coordinates .....	184
Entering Cylindrical Coordinates .....	185
Using Point Filters and Tracking .....	185
Using Point Filters in 2-D .....	186
Using Point Filters in 3-D .....	186
Using Tracking .....	186
Defining User Coordinate Systems .....	188
Understanding the User Coordinate System Icon .....	189
Changing the Appearance of the UCS Icon .....	191
Changing the User Coordinate System .....	191
Saving and Restoring a UCS .....	194
Using a Predefined Orthographic UCS .....	195
Assigning a UCS to a Viewport .....	197
<b>7 Modifying Objects .....</b>	<b>199</b>
Selecting Objects .....	200
Object Selection Methods .....	200
Using Selection Filters .....	207
Choosing the Modification Command First .....	217

Selecting Objects First .....	217
Editing with Grips .....	218
Erasing Objects .....	219
Duplicating Objects .....	220
Copying Objects Within a Drawing .....	220
Copying Using Grips .....	223
Copying and Pasting Using the Clipboard .....	223
Offsetting Parallel Copies .....	228
Mirroring Objects .....	230
Arrayed Objects .....	231
Rearranging Objects .....	237
Moving Objects .....	237
Rotating Objects .....	238
Aligning Objects .....	241
Resizing Objects .....	242
Stretching Objects .....	242
Scaling Objects .....	244
Extending Objects .....	247
Trimming Objects .....	250
Lengthening Objects .....	252
Breaking Objects .....	254

## Part II

### Moving Beyond the Basics

 <b>8</b> Organizing Drawing Information .....	259
Organizing Information on Layers .....	260
Creating and Naming Layers .....	264
Setting the Current Layer .....	265
Controlling Layer Visibility .....	267
Locking and Unlocking Layers .....	268
Setting the Layer Color .....	269
Setting the Layer Linetype .....	270
Setting the Layer Lineweight .....	271
Setting the Layer Plot Style .....	272
Undoing Layer Changes .....	273
Applying Layer Filters .....	275
Saving Layer States .....	278
Working with Linetypes .....	281
Loading Additional Linetypes .....	282
Creating New Linetypes .....	284
Applying Drawing Standards .....	291
Defining Standards .....	291
Checking for Standards Violations .....	293
Translating Layer Names and Properties .....	300
 <b>9</b> Getting Drawing Information .....	305
Specifying Measurements and Divisions .....	306
Measuring Segments on Objects .....	307
Dividing Objects into Segments .....	309

Calculating Areas .....	311
Calculating Areas Defined by Points .....	311
Calculating the Area Enclosed by an Object .....	312
Calculating Combined Areas .....	313
Calculating Distances and Angles .....	314
Displaying Information About Your Drawing .....	316
Displaying Information About Objects .....	316
Displaying the Drawing Status .....	317
Tracking Time Spent Working on a Drawing .....	318
<b>10</b> Editing Complex Objects .....	<b>321</b>
Grouping Objects .....	322
Creating Groups .....	324
Selecting Groups .....	325
Editing Groups .....	327
Editing Polylines .....	328
Opening and Closing Polylines .....	330
Curving and Decurving Polylines .....	331
Joining Polylines .....	332
Joining Polylines That Don't Exactly Meet .....	333
Changing the Width of Polylines .....	334
Editing Polyline Vertices .....	334
Editing Multilines .....	336
Editing Splines .....	337
Exploding Objects .....	340
Chamfering and Filletting Objects .....	340
Chamfering Objects .....	341
Filletting Objects .....	344
<b>11</b> Changing Properties .....	<b>349</b>
Changing Object Properties .....	350
Changing Layers .....	351
Changing Colors .....	352
Changing Linetypes .....	352
Changing Lineweights .....	353
Changing Plot Styles .....	353
Using the Properties Window .....	355
Using Keyboard Shortcuts in the Properties Window .....	357
Changing Properties .....	358
Matching Object Properties .....	360
Renaming Objects and Elements .....	362
Removing Unused Items .....	364
<b>12</b> Adding Cross Hatching .....	<b>367</b>
Adding Hatch Objects .....	368
Selecting the Pattern Type .....	370
Controlling the Pattern Properties .....	373
Defining Hatch Boundaries .....	374

	Using the Boundary Options .....	375
	Using the Direct Hatch Option of the HATCH Command .....	378
	Modifying Hatch Objects .....	380
	Modifying the Hatch Boundaries .....	381
	Exploding Hatch Objects .....	381
	Controlling the Visibility of Hatch Objects .....	382
	Creating Custom Hatch Patterns .....	384
	Automating Hatch Pattern Creation .....	388
<b>13</b>	<b>Working with Text .....</b>	<b>391</b>
	Creating Line Text .....	392
	Entering Special Characters .....	394
	Setting Line Text Justification .....	394
	Setting Line Text Height .....	396
	Creating Paragraph Text .....	399
	Setting Options on the Command Line .....	403
	Formatting Multiline Text .....	405
	Inserting Text from Outside of AutoCAD .....	412
	Importing Text .....	413
	Dragging-and-Dropping Text .....	413
	Cutting-and-Pasting Text .....	414
	Working with Text Styles .....	414
	Choosing the Font and Font Style .....	417
	Setting the Text Height .....	418
	Controlling Text Effects .....	418
	Editing and Changing Text .....	422
	Editing Single-Line Text .....	423
	Editing Multiline Text .....	424
	Modifying Text and Text Properties .....	424
	Scaling Text .....	424
	Justifying Text .....	426
	Finding and Replacing Any Kind of Text .....	427
	Checking Spelling .....	428
	Choosing a Dictionary .....	429
	Using the Express Text Tools .....	431
<b>14</b>	<b>Dimensioning Your Drawing .....</b>	<b>433</b>
	Understanding Dimensioning Concepts .....	434
	Creating Dimensions .....	437
	Creating Linear Dimensions .....	438
	Creating Angular Dimensions .....	444
	Creating Diameter and Radius Dimensions .....	449
	Creating Ordinate Dimensions .....	450
	Dimensioning Multiple Objects .....	452
	Editing Dimensions .....	455
	Changing Dimensioned Geometry .....	455
	Changing Dimension Associativity .....	457

Making Dimensions Oblique .....	458
Modifying Dimension Text .....	459
Changing Dimension Properties .....	462
Creating Leaders and Annotations .....	463
Modifying Leaders .....	467
Understanding Dimension Styles and Variables .....	469
Controlling Dimension Lines and Arrows .....	472
Controlling Dimension Text .....	474
Controlling the Fit of Dimension Text and Arrowheads .....	477
Controlling the Primary Dimension Units Format .....	480
Controlling Alternate Dimension Units .....	483
Controlling Dimension Tolerances .....	485
Managing Dimension Styles .....	487
Changing the Dimension Style Assigned to a Dimension .....	488
Overriding Dimension Variables .....	489
Modifying Dimension Styles .....	490
Comparing Dimension Styles .....	490
Adding Geometric Tolerances .....	491

## 15 Working with Blocks, Attributes, and

External References .....	497
Working with Blocks .....	498
Creating Blocks .....	499
Inserting Blocks .....	506
Exploding Blocks .....	510
Editing Block Descriptions .....	511
Redefining Blocks .....	511
Working with Attributes .....	512
Creating Attributes .....	513
Editing Attribute Definitions .....	515
Attaching Attributes to Blocks .....	515
Editing Attributes .....	520
Extracting Attribute Information .....	528
Working with External References .....	533
Attaching External References .....	534
Overlaying External References .....	535
Managing External References .....	536
Detaching External References .....	541
Unloading and Reloading External References .....	541
Binding External References to Drawings .....	542
Clipping Blocks and External References .....	545
Changing the Path for External References .....	548
Editing References in Place .....	551
Editing Blocks and External References .....	551
Adding or Removing Objects from the Working Set .....	553
Saving Back Changes to References .....	555

<b>16</b>	<b>Managing Content with AutoCAD DesignCenter</b> .....	557
	Understanding the DesignCenter Interface .....	558
	Using the Tree View .....	560
	Using the Palette .....	561
	Using AutoCAD DesignCenter .....	564
	Opening Drawings .....	564
	Finding Content .....	565
	Adding Content to Drawings .....	567
	Retrieving Frequently Used Content .....	570
<b>17</b>	<b>Creating a Layout to Plot</b> .....	573
	Using Paper Space and Model Space .....	574
	Switching to Paper Space .....	579
	Switching to Model Space .....	580
	Creating Layouts .....	581
	Using the Create Layout Wizard .....	581
	Using the Page Setup Dialog Box .....	586
	Working with Layouts .....	593
	Naming and Saving a Page Setup .....	594
	Importing a Named Page Setup .....	596
	Using Layout Templates .....	597
	Inserting a Layout from a Template .....	597
	Inserting a Layout Using AutoCAD DesignCenter .....	599
	Saving a Layout Template .....	599
	Using PCP and PC2 Settings in a Layout Template .....	600
	Creating Floating Viewports .....	603
	Placing Floating Viewports in a Layout .....	603
	Placing Saved Viewport Configurations in a Layout .....	608
	Changing the Properties of a Viewport .....	609
	Controlling Visibility in Floating Viewports .....	612
	Controlling Layer Visibility in Floating Viewports .....	612
	Removing Hidden Lines When Plotting Viewports .....	615
	Turning Floating Viewports On and Off .....	618
	Editing in Floating Viewports .....	619
	Scaling the Viewport Contents .....	619
	Locking the Viewport Scale .....	621
	Scaling Linetype Patterns in Paper Space .....	623
	Aligning and Rotating Views in Floating Viewports .....	623
	Creating Nonrectangular Viewports .....	626
<b>18</b>	<b>Plotting Your Drawing</b> .....	629
	Understanding Plotting .....	630
	Understanding Layouts .....	631
	Understanding Plot Styles .....	631
	Understanding Plotter Configurations .....	632
	Plotting a Drawing .....	634
	Selecting What to Plot .....	636
	Stamping Each Plot .....	636

Plotting to a File .....	638
Controlling Plot Settings .....	639
Previewing the Output .....	639
Using Plot Styles .....	642
Understanding Plot Style Modes .....	643
Creating a Plot Style Table .....	648
Attaching Plot Style Tables to Layouts .....	652
Adding, Renaming, and Deleting Plot Styles in a Named Plot Style Table .....	653
Editing Plot Styles .....	656
Changing the Plot Style Property for an Object or Layer .....	666
Using the Batch Plot Utility .....	668
Selecting the Drawings To Be Plotted .....	668
Selecting Layouts To Be Plotted .....	670
Controlling Page Setups .....	671
Selecting the Plot Device .....	671
Controlling Plot Settings and Layers To Be Plotted .....	672
Logging Batch Plot Operations .....	673
Plotting Using the Batch Plot Utility .....	673

### Part III

## Becoming an Expert

<b>19</b>	Drawing in Three Dimensions .....	679
	Viewing Objects in Three Dimensions .....	680
	Understanding Standard Views and Projections .....	681
	Setting a Viewing Direction .....	682
	Displaying a Plan View .....	686
	Manipulating 3-D Views Interactively .....	687
	Using the 3DORBIT Command .....	688
	Setting Perspective and Parallel Projections .....	693
	Shading and Hiding Objects .....	694
	Using Clipping Planes .....	698
	Using the 3-D Orbit Visual Aids .....	700
	Creating Three-Dimensional Objects .....	704
	Creating Three-Dimensional Wireframe Objects .....	704
	Creating Three-Dimensional Meshes .....	704
	Creating Three-Dimensional Solids .....	713
<b>20</b>	Editing in Three Dimensions .....	733
	Rotating in Three Dimensions .....	734
	Array in Three Dimensions .....	737
	Mirroring in Three Dimensions .....	741
	Aligning Objects in Three Dimensions .....	743
	Editing Three-Dimensional Mesh Objects .....	746
	Editing 3-D Polyline Vertices .....	747

<b>21</b>	<b>Editing Three-Dimensional Solids</b> .....	751
	Chamfering Solids .....	752
	Filleting Solids .....	755
	Sectioning Solids .....	758
	Slicing Solids .....	761
	Editing Solids .....	762
	Editing Faces of Solids .....	763
	Editing Edges of Solids .....	775
	Editing Entire Solids .....	777
	Representing Solids Using SOLPROF, SOLVIEW, and SOLDRAW .....	782
	Setting Up Views .....	783
	Converting Views into Profiles and Sections .....	788
	Creating Profiles .....	790
<b>22</b>	<b>Creating Three-Dimensional Images</b> .....	793
	Creating Hidden-Line Images .....	794
	Creating Shaded Images .....	797
	Creating Rendered Images .....	799
	Controlling Rendering .....	800
	Working with Lights .....	805
	Working with Materials .....	813
	Adding a Background .....	828
	Adding Landscaping and People .....	830
	Using Scenes .....	838
	Rendering to Other Destinations .....	843
<b>23</b>	<b>Using Raster Images</b> .....	845
	Attaching Raster Images .....	846
	Scaling an Image for Tracing .....	849
	Managing Raster Images .....	851
	Viewing Image File Details .....	853
	Detaching Images .....	854
	Unloading and Reloading Images .....	855
	Changing Image Filenames and Paths .....	855
	Modifying Raster Images .....	856
	Adjusting Images .....	858
	Hiding Image Boundaries .....	859
	Controlling Image Transparency .....	860
	Controlling Image Quality .....	861
	Clipping Raster Images .....	861
<b>24</b>	<b>Working with Other Applications</b> .....	867
	Working with Other File Formats .....	868
	Exporting Drawings to Other Formats .....	868
	Importing Other Formats into the Current Drawing .....	873
	Inserting Markup Data from Volo View Express .....	875

Working with Other Applications .....	877
Using AutoCAD Data in Other Applications .....	877
Using Data from Other Applications in AutoCAD .....	880
Working with OLE Objects .....	887
Saving and Viewing Slides .....	891
Creating Slides .....	893
Viewing Slides .....	894
Creating and Using Slide Libraries .....	894

## Part IV

### Advanced Topics

<b>25</b>	<b>Web-Enabling AutoCAD Drawings .....</b>	<b>899</b>
	Opening and Saving Files from the Internet .....	901
	Setting Up FTP Accounts .....	904
	Adding Folders to the Places List .....	904
	Setting the Default Internet Location .....	906
	Working with Other Commands Over the Internet .....	907
	Working with Hyperlinks .....	907
	Creating DWF Files .....	916
	Understanding What Gets Written to a DWF File .....	919
	Creating DWF Files .....	921
	Controlling DWF Properties .....	922
<b>26</b>	<b>Leveraging the Internet .....</b>	<b>925</b>
	Sending AutoCAD Drawings via E-Mail .....	926
	Transmitting Files .....	928
	Accessing the Internet from Within AutoCAD .....	931
	Using the AutoCAD Today Window .....	933
	Using Meet Now .....	934
	Sharing Control of an AutoCAD Session .....	938
	Using NetMeeting .....	940
	Using Autodesk's Viewers .....	942
	Getting WHIP! .....	943
	Viewing DWF Files Using Your Web Browser .....	944
	Publishing Drawings to the Web .....	952
	Using the Publish to Web Wizard .....	952
	Creating Your Own HTML Documents .....	957
	Adding i-Drop Content to Your Web Page .....	965
<b>27</b>	<b>Working with External Databases .....</b>	<b>971</b>
	Understanding Database Connectivity .....	972
	Connecting to External Databases .....	974
	Using the ODBC Data Source Administrator .....	975
	Configuring a Data Source .....	977
	Using the dbConnect Manager .....	980

Viewing Table Data from Within AutoCAD	981
Using the Data View Window	982
Working with Table Data	987
Saving Your Changes	989
Creating Links to Graphical Objects	989
Editing Link Templates	992
Viewing Link Data	993
Automatically Viewing Link Data	996
Editing Link Data	997
Synchronizing Links	998
Exporting Links	999
Creating Labels	1001
Editing Label Templates	1004
Updating Labels with New Database Values	1005
Using Shortcut Menu Options for Links and Labels	1006
Working with the Query Editor	1008
Using the Quick Query Tab	1010
Using the Range Query Tab	1012
Using the Query Builder Tab	1013
Using the SQL Query Tab	1016
Working with Stored Queries	1016
Using Link Select to Create Selection Sets	1019
<b>28 Customizing AutoCAD Without Programming</b>	<b>1023</b>
Creating Command Aliases	1024
Customizing Toolbars	1026
Changing a Toolbar Name	1026
Modifying Existing Toolbars	1027
Creating a New Toolbar	1029
Modifying Menus	1036
Understanding the Pull-Down Menu Structure	1037
Creating a Custom Menu	1040
Adding Keyboard Shortcuts	1044
<b>29 Some Programming Required</b>	<b>1049</b>
Creating Scripts	1051
Invoking a Script when Loading AutoCAD	1054
Creating Slide Shows	1054
Introduction to AutoLISP	1057
Loading AutoLISP Applications	1058
Loading AutoLISP Programs Automatically	1060
Creating an AutoLISP Program	1062
Introducing Visual LISP	1069
Introduction to ActiveX Automation	1072
Understanding Objects	1072
Using Visual Basic for Applications	1073
Using ActiveX Automation with Other Applications	1084

**Part V**

■	About the Appendixes Online .....	1087
■	Index .....	1093
